SUMMARY

Motivated full-stack developer experienced in building web applications using React.js, Next.js, Node.js + expressJS, TypeORM, and MYSQL. I'm eager to learn new technologies, adapt quickly, and contribute to both personal and organizational growth through meaningful work.

SKILLS

- **Languages:** Javascript, React.js, Next.js, CSS ,HTML, Tailwind CSS, Bootstrap, Node.js
- **Database:** MYSQL
- **Tools and Platforms:** Github, Postman, DBeaver
- **Soft Skills:** Debugging, Problem Solving, Team Management, Fast Learner

WORK EXPERIENCE

Web Developer - Saasbrew

March 2024 - Present

- Led the development of full-stack applications with a primary focus on building responsive and scalable frontend solutions.
- Designed and implemented dynamic user interfaces using Next.js and Material UI, ensuring optimal performance, accessibility.
- Collaborated with the backend team by contributing to CRUD APIs using Node.js and TypeORM.
- Integrated Redux in the Next.js frontend for efficient state management and enhanced browser performance.
- Designed and developed responsive, user-friendly dashboards using Material UI, following best UI/UX practices.
- Also worked with Node.js, TypeORM, and MySQL to support frontend needs like fetching and updating data.
- Managed version control and collaborative development using GitHub and followed industry best practices for code reviews and branching strategies.

PROJECTS

Nexus-Connect Dashboard

December2024- Present

Next.js, Typescript, MYSQL , MaterialUI, TailwindCSS

- Worked on a full-stack project using Next.js, TypeScript, and Material UI Tailwind CSS for building responsive and user-friendly dashboard.
- Used **Redux** for efficient state management, improving **browser performance** and reducing load times.
- Integrated **Sentry** to establish robust real-time error tracking and monitoring, enabling proactive identification and resolution of frontend issues to maintain a seamless user experience.
- I contributed to backend development by creating and managing database schemas with proper relationships and implementing **TypeORM entities**.
- I also developed a few essential **CRUD** (Create, Read, Update, Delete) APIs, which I then seamlessly integrated and consumed within the frontend application to ensure efficient data fetching and manipulation.
- Built and maintained **reusable UI components** , speeding up feature delivery and reducing the frontend bugs.
- Developed responsive, high-quality UI components and dashboards using Next.js and MUI and Tailwind CSS enhancing user experience and frontend performance

Probiz-Connect Dashboard

March 2024 - November 2024

- Worked on a front-end project using React.js, and Material UI Tailwind CSS for building responsive and user-friendly dashboard.
- Used Redux to manage complex application state, making the codebase cleaner and easier to maintain, reducing data fetching times by 30% across multiple components
- Designed mobile-friendly dashboards using React.js, MUI, and Tailwind CSS to make the website look good and work well on all devices.
- Optimized **REST API** calls to reduce to load times resulting in 15% increase of the page speed.
- Used Redux to manage complex application state, making the codebase cleaner and easier to maintain.
- Fixed design issues and bugs reported during testing. Improved user experience and reduced frontend errors

EDUCATION

Bachelor of Computer Application(BCA)
Master of Computer Application(MCA)

Jodhpur, Rajasthan, India
July 2018- March 2023
